An accounting ledger for keeping track of expenses and managing the budget; it features four tabs including YTD Budget Summary and Monthly Expenses Summary.

General ledger - templates.office.com

We describe extensions to the Excel spreadsheet that integrate user-defined functions into the spreadsheet grid, rather than treating them as a "bolt-on". Our case study is unusual in that it highlights the way that programming language insights can be applied to a product not normally considered as a programming language. Even more unusual, our design [...]

In this paper, we describe a possible extension to Excel that supports user-defined functions (Section 4). It turns out that support for functions is closely associated with better support for vectors and matrices as first-class values, and we discuss that too (Section 5). The basic idea is simple. We propose that functions be defined in 1
